Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1771

1. Prosecution on the merits of this application is reopened on claims 28-20 considered unpatentable for the reasons indicated below:

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 28-30 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 93/08322. WO 93/08322 discloses a high strength material made by a method of arranging a plurality of filaments, applying molten polymer particles having a size of 10-250 mesh, (10 mesh corresponds to 2mm), in an amount of 0.25-10 parts by weight binder per 100 parts by weight mat, which would appear to meet the claimed limitation that the final volume ratio of matrix to the plurality of filament in the composite is approximately 0,4 or less, wherein the applied polymeric binder particles bond at least to fibers in a fixed relationship. See pages 5-7 as well as claim 1. The particles can be applied by spraying. The spray acts to compress the web of fibers, (see example 1, page 10). WO '322 does not disclose the claimed SEAT value, however, WO '322 appears to have the

Art Unit: 1771

identical structure and therefore it is reasonable to presume that it would have the same SEAT value.

5. Applicant is advised that the Notice of Allowance mailed 4/4/05 is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.
